

KRKA ENDURO RAID 2017 CLOSING BALANCE AND SOME NUMBERS OF THIS EDITION

Primosten – 2017, 2nd may – The reentry at home of competitors and staff has underlined the end of the seventh edition of the Krka Enduro Raid. In Croatia just stay some men of the organization, TRX, to clean and restore the track, while Marco Borsi is tracing the closing balance of the event and he already thinks about the next Croatia Rally, ready for the start in two weeks.

"Our event has grown in the number of the participants – he explains - but we have succeeded in managing it very well, thanks to a staff that in these years has acquired a safety and a strong feeling growing all the time and that it does that the things almost come in automatic. At the end of the event I have talked to the participants and I have found great satisfaction. We have also been lucky with the wether and at the end the world of the 'amateur', of the real enduro fan, has won and prevailed on every other."

The participants therefore, have been 555 and of them just 155 has faced the whole track, means as red zones and therefore checked by crono in two days. This year the red zone was represented by 3 special tests, two in the beach and one in the middle of the vineyards, and from 4 times check, two a day.

None of the riders has succeeded to close the Krka Enduro Raid with zero penalty in TC, not even the winner, Rudy Poeschl (Husqvarna) that in the first time check of the second day has paid a delay of 15".

330 riders have effected the special test in the beach the first day, while in the second and last day just 257 competitors have crossed the layout that brought to the amazing Sardine Party. The Enduro test in the vineyard has seen 247 participants on this special stage of five kilometers that has received a lot of success among the participants.

Great success then of the Krka Enduro Raid on the Social Media.

Facebook page - Krka Enduro Raid - created for the event has recorded 10k contacts in only two days and today, after just a week from its creation, it can boast a coverage of 21.324 reached people, but, above all, an interaction with 21,518 people with 3582 visualizations of the videos with points of over 1000 visualizations for every single video. The appointment for **2018** will be for **27 and 28 April** with the eighth edition of the Krka Enduro Raid signed TRX.
